

Stampin' Template - One Sheet Layered Pocket Card

This fancy card has lots of places to tuck extra special things for someone special.

Supplies Needed

- 1 piece of 8.5" x 11" cardstock or DSP
- 2 pieces of 3.5" x 5" Basic White cardstock
- 2" x 5.5" coordinating color
- 2" x 4.25" another coordinating color
- Fancy Tag Topper punch
- 2 pieces of coordinating ribbons 5" each
- ruler, pencil, scissors, bone folder, liquid glue
- Cardstock scraps for creating a sentiment for the card front
- paper trimmer with scoring blade

Directions

1. Score the 8.5" x 11" cardstock/DSP in half in both directions. Measure and score at 4.25" along the short side and at 5.5" along the long side of the paper. Fold on these score lines with a bone folder one at a time in both direction to make the score line very flexible.
2. Decide which side of the cardstock/DSP you want to be on the front of the card and turn that facing down so that you are looking at the backside. Very lightly label the 4 quadrants of the paper with pencil (or sticky notes) as shown in Figure A.
3. Measure and make a mark at 2.75" along each edge out from the corner of quadrant 1. Draw a pencil line connecting these marks. Cut off the corner along the drawn line. See Figure B.
4. Measure and make a mark at 4.25" along each edge out from the corner of quadrant 4. Draw a pencil line connecting these marks. One of the marks will be right at the center score line. Cut off the corner along the drawn line. See Figure B.
5. Cut along the score line between quadrants 1 and 3 up to the center of the cardstock/DSP. Trim a tiny bit extra on either side of the cut line to create space for folding. See Figure B.
6. Place a small bead of liquid glue on the edge of quadrant 1 as shown in Figure C.

This fancy card has lots of places to tuck extra special things for someone special.

7. Fold quadrant 1 to the right over quadrant 2, lining up the edges. This creates Pocket #1. See Figure D.
8. Place a small bead of liquid glue on the two edges of quadrant 4 as shown in Figure D.
9. Fold quadrant 4 up and over the first pocket, aligning the edges to create Pocket #2. See Figure E.
10. Wrap quadrant 3 around to the back of the pockets. This creates the back and the inside of the card. See Figure F. Figure G shows how the card will look on the inside.

This fancy card has lots of places to tuck extra special things for someone special.

11. Attach one of the pieces of 3.5" x 5" Basic White cardstock to the center of the card over quadrant 3 for the inside sentiment. Use the other piece as the insert for Pocket #1.
12. Use the Fancy Tag Topper punch to create tags out of the coordinating 2" cardstock strips. Insert these tags into Pocket #2. The longer tag made out of the 5.5" strip could be made into a bookmark.
13. Decorate the tags and insert in the pockets as desired. Punch or die cut with cardstock scraps to create a sentiment for the card front. Give to a VERY special person!

Pocket-Filling Ideas

- Instead of filling pocket #2 with tags, create another insert measuring 3" x 4".
- Photographs
- Seed packet
- Gift card
- Tea bags
