Stampin' Template - Overlapping Gatefold Card

Patterned paper is the star of this simple 3 in 1 card template.

Supplies Needed
- 1 piece of 12 x 12 double-sided patterned paper (makes 3)
- 5 1/2" x 4 1/4" card base in coordinating CS (3)
- Layered dies or punches to create focal point
- Embellishments or ribbon to decorate focal point

Directions
1. Score the 12 x12 patterned paper at 3 1/2" and 8 3/4" along one edge.
2. Turn the patterned paper so that the score lines are horizontal and cut the paper at 4" and 8". This will give you 3 - 4" x 12" pieces of patterned paper.
3. Fold on the score lines so that the gatefold edges overlap. Decide which side fold you want on top. Optional: tear a small amount off the edge of this flap to give it some texture.
4. Attach the patterned paper card to the quarter sheet of coordinating cardstock. Add a layered focal point image to only one half of the gatefold (the fold on top). Embellish as desired.
