

Card Template - Trifold Window Card

Create a dramatic opening for your card using both sides of your patterned paper!

Supplies Needed

- 5.25" x 12" Double-sided patterned paper (DSP)
- 5.5" x 4.25" Coordinating cardstock
- 3.75" x 5" Basic White cardstock
- Punch or Dies to create a window
- Basic White cardstock to cut out window shape insert
- Coordinating cardstock to create a frame around the window
- Scraps to create decor for the card front

Optional Supplies

- Pair of same shaped dies that nest together (two sizes)
- Cut & Emboss Machine

Directions (using optional supplies)

1. Score the 5.25" x 12" patterned paper 4" in from each side. Fold on these score lines towards the center of the strip of paper overlapping one side over the other (trifold). Press with a bone folder.
2. Use the smaller of the two nesting shaped dies to cut out a shape in the top flap of the trifold. Be sure to open up the trifold card first before cutting. This will be the window on the card front. (The shape that gets cut out of this patterned paper is extra)
3. Use the same smaller die to cut out a shape in Basic White cardstock (for the greeting).
4. Cut out a frame for the window on the front of the card using two sizes of the same shaped dies nested together on coordinating cardstock and running through the Cut & Emboss Machine. (The smaller shape that gets cut out this time will also be extra)
5. Using liquid glue attach the frame to the card front around the window hole. Then close the card and using liquid glue attach the Basic White cardstock shape to the second trifold layer by inserting it through the window. This will ensure that the frame and the insert are perfectly aligned.
6. Stamp greeting of choice on the Basic White shape.
7. Decorate/embellish around the frame on the card front.
8. Attach 3.75" x 5" Basic White cardstock to inside of card for inside greeting.
