

# Stampin' Technique - Baby Wipe

Use Stampin' Up! ink refills and baby wipes to create your own multi-color ink pads.

## Supplies Needed

- 2 or 3 baby wipes
- 3-4 colors of ink refills
- Stamp images
- White or neutral cardstock
- Plastic gloves if you don't want inky fingers.

## Directions

1. Layer 2-3 baby wipes on top of each other (depending on how thick they are) and fold in half or into quarters. Think about the size of the image you will be stamping to help you determine the size of the baby wipe ink pad.
2. Use the ink refill bottles to create a colorful ink pad. Start with one color and add a few drops in 3 or 4 places. Take the next color and add a few drops next to the first color. Continue this process until you have added all the ink colors you want to your baby wipe ink pad.
3. Take your stamp image and ink it in the baby wipe tapping in up and down a couple times without moving it back and forth too much. This will get a good covering of ink on the image and also not muddy the colors too much. Stamp on your cardstock and be amazed!!!

## Wipe Swipe Variation

Once you have "used up" most of the ink refills in your baby wipe ink pad (you will notice that the images are not as vibrant or the colors are mixing together), use the remaining color to create backgrounds on cardstock.

- Stripes are easy to create by swiping the wipe from one edge of the cardstock to another. Be sure to start off the edge and continue off the opposite side for a smooth look.
- You can also gather the baby wipe into a ball (use gloves here) and tap up and down onto cardstock to create a spongy/splatter look.
