

Stampin' Card Template - #5 Perfectly Slanted

The lines on this card create a beautifully perfect layout.

Basic Supplies Needed - makes 2 cards

- 4" x 11" cardstock base, scored at 5 1/2" (cut 2)
- 4" x 5.5" DSP (2 sheets that coordinate)
- 2.5" square DSP cut with circle die or punch (cut 2)
- 2.5" x .5" Basic White (cut 2)
- 7" ribbon (cut 2)

Directions

1. Lay the 2 - 4" x 5.5" patterned papers on top of each other so that you can cut them at the same time. Make sure the sides that you want showing on your card front are facing up. Measure 1 1/2" down from the top right corner and 2 1/2" up from the bottom left corner and make a mark. Draw a line to connect the two marks and cut on this line. This will give you four pieces to make 2 cards.
2. Mix and match the diagonal cut patterned paper so that you have a top and bottom piece of each pattern and attach to the card front.
3. Fold the 7" of ribbon in half and attach the fold to the top diagonal cut about 1/4" from the left edge of the card and 2" from the top edge of the card. This ribbon will be a layer under the circle.
4. Cut 2 circles out of the 2.5" square (DSP) patterned paper using a circle die or punch. The circle size can be any size between 2" and 2 1/4" in diameter. Pop up the circle with dimensionals over the ribbon. The circle should sit about 1/3 of the way over the seam where the 2 papers meet so that the majority of the circle is on the top half of the card.
5. Stamp greeting sentiment on the 2.5" x .5" piece of Basic White and mount horizontally across the bottom right of the circle and slightly underneath the ribbon layer.
6. Add an embellishment to the circle to finish off the card.

Variation to the Template so that the card base shows:

- 4 1/4" x 11" cardstock base, scored at 5 1/2"
- 4" x 5 1/4" DSP

Ways to Step-Up the Template:

- Add a 4 1/2" x 1/4" strip of cardstock or glitter paper along the diagonal seam and trim even with the edges of the card front.
- Add a matte layer to the circle in a coordinating color.
- Use cardstock as instead of one of the pieces of patterned paper and emboss with an embossing folder before making the diagonal cut.
