

Inspiration Sheet - Pearlescent Specialty Paper

3 Ideas for using this shiny shimmery paper.

Pearlescent Specialty Paper: 154291 \$4.00

* 2 - 12" x 12" sheets, Acid free, Lignin free

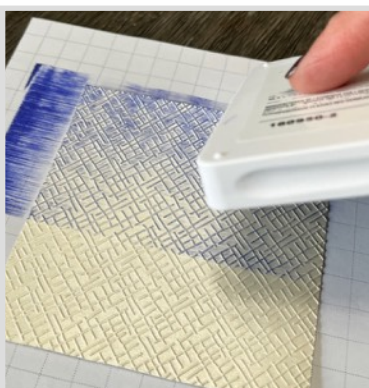

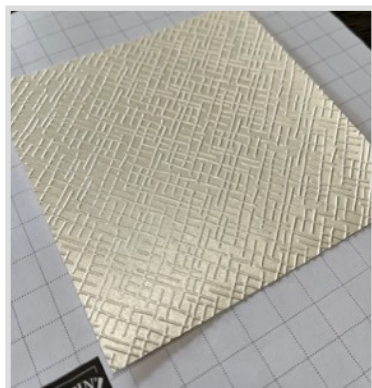

#1 - Dry Emboss with Embossing Folder

- Any embossing folder
- Optional: Classic Ink Pad

Use any embossing folder with this malleable paper to create a gorgeous card front, and layer for a simple focal point.

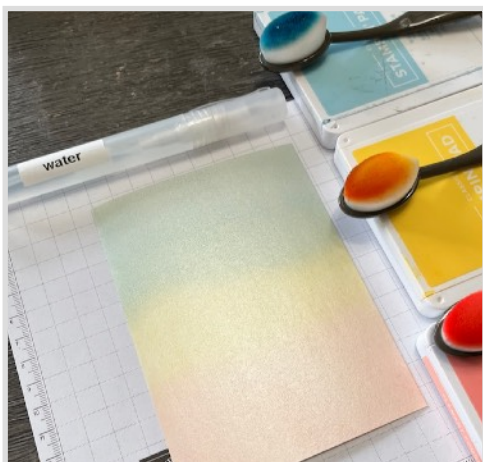

Optional: add color to the embossed card front with the direct-to-paper technique. Drag the edge of the ink pad held at a 45° angle over the raised paper.

#2 - Blending Brushes & Spritzed Water

- 2-3 Classic Ink Pads with coordinating colors
- Blending brush for each ink color
- Stampin' Spritzer filled with water

Using a blending brush pick up ink by swirling over an ink pad, then with a circular motion apply the ink to the Pearlescent Paper. Continue to apply ink until the desired intensity of color is achieved. Let this ink dry completely (use a heat tool to speed the process) then lightly spritz with water and carefully blot with a tissue to pull off the water. There will be gorgeous watermarks left.

#3 - Polished Stone Background

- Cotton Ball
- Classic Ink Refills - 2 or 3 colors
- Isopropyl Alcohol 70% or higher

Dip the cotton ball in alcohol so that it is about half full of alcohol. Add 2-3 drops of each ink refill color side by side on the cotton ball with about 1/4" in between colors. Dab the cotton ball up and down across the Pearlescent Paper until desired effect is achieved. Let dry, then use for background or stamp over with StazOn ink.
