Cutting Directions for the 6 pieces of DSP

Before you begin cutting, arrange the 4" x 6" pieces of pattern paper so that the paper's images are oriented vertically. This will ensure the direction of the pattern will be oriented correctly before cutting into the paper. Once the pieces are all going in the right direction, trim off 1/2" from the top or bottom of each piece. Depending on your paper trimmer you may be able to do this all at once, or one at a time.
