

Inspiration Sheet – 3 Kinds of Shaker Cards

Add some movement and interaction to your card front.

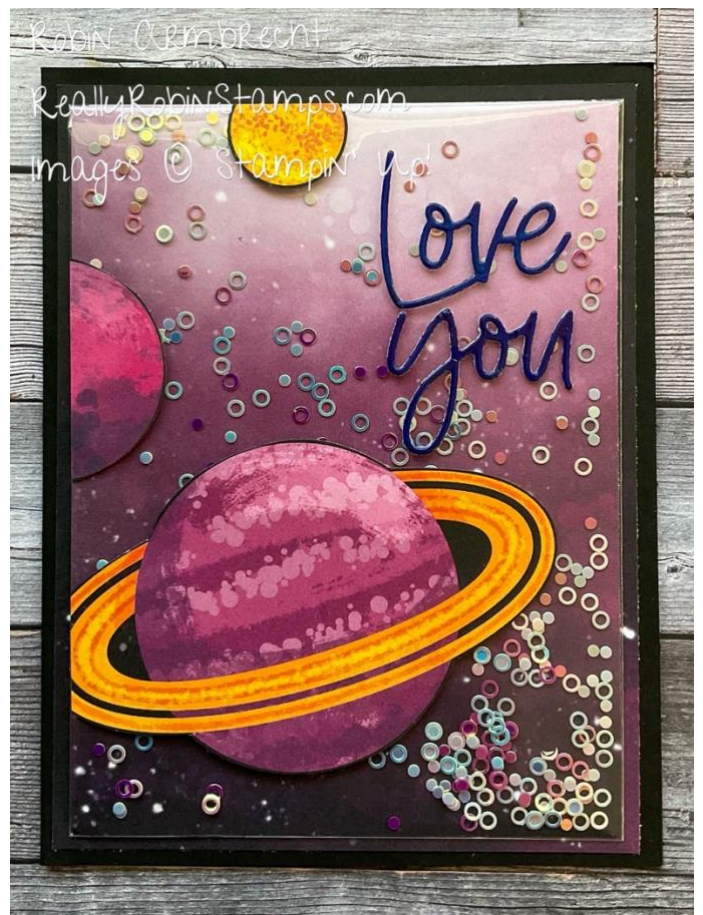

1 - Faux Shaker

Supplies

- Clear envelope
- Cardstock for inside envelope
- 5-1/2" x 8-1/2" cardstock for card base

Directions

1. Stamp & decorate the piece of cardstock and insert into the clear envelope tightly in one corner and along the bottom of the envelope.
2. Add shaker elements inside the envelope in front of the stamped cardstock piece.
3. Fold extra side and top edges of the clear envelope to the back side and adhere with tape so that the clear envelope is the same size as the cardstock piece.
4. Add dimensionals to the back and pop up on card front OR adhere directly to the card front and pop up a rectangular window frame over the envelope.

Add some movement and interaction to your card front.

2 – Standard Shaker Element

Supplies

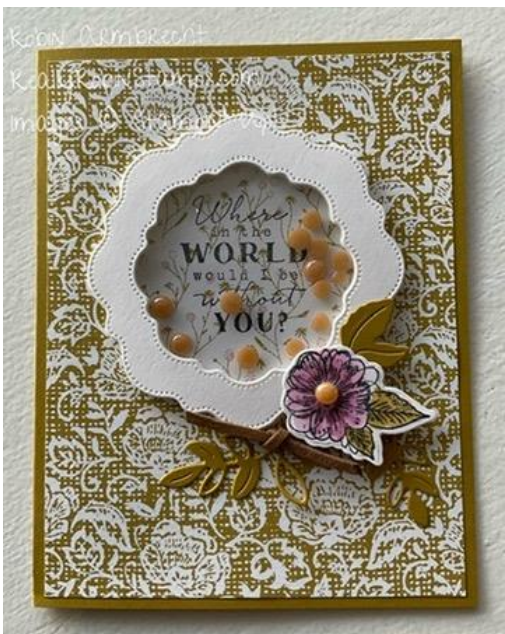

- 5-1/2" x 8-1/2" cardstock for card base
- Foam Adhesive Strips or Foam Adhesive Sheets
- Acetate (clear window sheet)
- Dies or Punches to make a window
- 2 pieces of cardstock and/or DSP the same size.

How to layer a Shaker Window from Top to Bottom

- 1- Cardstock or DSP with a shaped window/hole
- 2- Window Sheet/Acetate slightly larger than the shaped window/hole
- 3- Foam adhesive placed or cut to surround the window/hole without being seen
- 4- Shaker Bits
- 5- Cardstock or DSP the same size or larger than #1 without a window/hole

Directions

1. Make a window/hole in a piece of cardstock or DSP. (Or create a frame with nested dies/punches)
2. Attach a piece of window sheet behind the cardstock and covering the window from the back side.
3. Turn the window upside down, and working from the back, add foam strips all the way around the edge of the window/hole. The foam should be slightly away from the edge of the window so it isn't seen from the front.
4. Add shaker elements carefully in the middle of the window.
5. Take off the adhesive on the foam strips and close the shaker with a piece of cardstock.
6. Attach the shaker feature to the card front.

Add some movement and interaction to your card front.

3 – See Through Shaker Card

Supplies

- 4-1/4" x 11" cardstock for card base
- Foam Adhesive Strips or Foam Adhesive Sheets
- 2 pieces of Acetate (clear window sheet)
- Dies or Punches to make a window
- 2 pieces of cardstock and/or DSP the same size.

To make a See-Through Shaker card you basically follow the same layering formula as the Standard Shaker with two changes. The first is that you create the same window/hole in the card front as you do for the shaker window. The second is that you add another layer of window sheet in place of the bottom layer of cardstock/dsp.
