

Inspiration Sheet - Paper Piecing Technique

An easy technique using pattern paper to “color” stamped images.

Supplies

- Pattern paper (DSP) with small patterns
- Scissors
- Stazon or Memento Black ink
- Stamp images with line art (solid lines are easiest to work with)

Directions

1. Ink the image in black ink and stamp on the pattern paper.
2. Cut out the image or part of the image you want “colored” in the pattern paper. It is important to cut as close to the black line on the image as possible without leaving a border.
3. Repeat stamping and cutting out other parts of the image with different pattern papers.
4. (Optional) Stamp the image in black ink on the card front.
5. Glue the cut out pieces on to the stamped images on the card front, filling in the image with the pattern paper cut-outs.
