

Stampin' Inspiration - Three Quadrangles Template #29

Supplies

- (3) 5 1/2" x 8-1/2" cardstock
- (3) 4" x 5-1/4" pieces of copy paper
- (3) 4" x 5-1/4" pieces of DSP
- (3) punch/die shapes for greetings
- Embellishments

Choices and Options

- Choose three different and coordinating patterns from the same package of DSP.
- Replace one of the DSPs with a coordinating cardstock color and emboss this with an embossing folder.

Directions

1. Stack the three pieces of DSP with the patterns you want to show facing up. Measure, mark (on the top DSP), and cut on the longest cutting line first. Cut all three pieces at the same time. Set aside quadrangle 1 pieces.
2. Measure, mark, and cut on the other shorter cutting line next. Keep the layers of pieces in their piles and push them back together to reform the original rectangle.
3. Starting with the QUAD 2 pile, shuffle the top layer to the bottom of the pile. Move the the QUAD 3 pile and shuffle the top two layers to the bottom of the pile. Now you should see all three of the different DSP patterns you chose; one pattern in each quadrangle section.
4. Assemble the three quadrangle card fronts onto copy paper first (trim if uneven) then attach to card bases.
5. Add simple greeting focal points, and embellishments.
